

## TASK 4: Enable Multi-Factor Authentication (MFA) for "S3-User":

To enable Multi-Factor Authentication (MFA) for "S3-User":

1. Select "S3-User" from IAM > User tab.

2. Then Navigate to Security Credentials and Scroll down to "Multi-factor authentication (MFA)" and click on "Assign MFA Device"

3. Now add device name and Select Authenticator app from MFA device list. Then click on next.

**Select MFA device** [info](#)

**MFA device name**

Device name  
Enter a meaningful name to identify this device.

Maximum 128 characters. Use alphanumeric and '+', '@', '-', '.' characters.

**MFA device**

Select an MFA device to use, in addition to your username and password, whenever you need to authenticate.

☒  **Authenticator app**  
Authenticate using a code generated by an app installed on your mobile device or computer.

☐  **Security Key**  
Authenticate using a code generated by touching a YubiKey or other supported FIDO security key.

- Using Microsoft Authenticator scan the QR Code. And then enter MFA code 1 and MFA code 2

**Set up device** [info](#)

**Authenticator app**  
A virtual MFA device is an application running on your device that you can configure by scanning a QR code.

1 Install a compatible application such as Google Authenticator, Duo Mobile, or Authy app on your mobile device or computer.  
[See a list of compatible applications](#)

2  Open your authenticator app, choose **Show QR code** on this page, then use the app to scan the code. Alternatively, you can type a secret key. [Show secret key](#)

3 Fill in two consecutive codes from your MFA device.

MFA code 1

MFA code 2

[Cancel](#) [Previous](#) [Add MFA](#)

- Now you will be able to verify the MFA setup in S3-User's Security credentials tab

**Identity and Access Management (IAM)**

**Multi-factor authentication (MFA)** (1)

Use MFA to increase the security of your AWS environment. Signing in with MFA requires an authentication code from an MFA device. Each user can have a maximum of 8 MFA devices assigned. [Learn more](#)

[Remove](#) [Resync](#) [Assign MFA device](#)
