

TASK 3: Create IAM Group

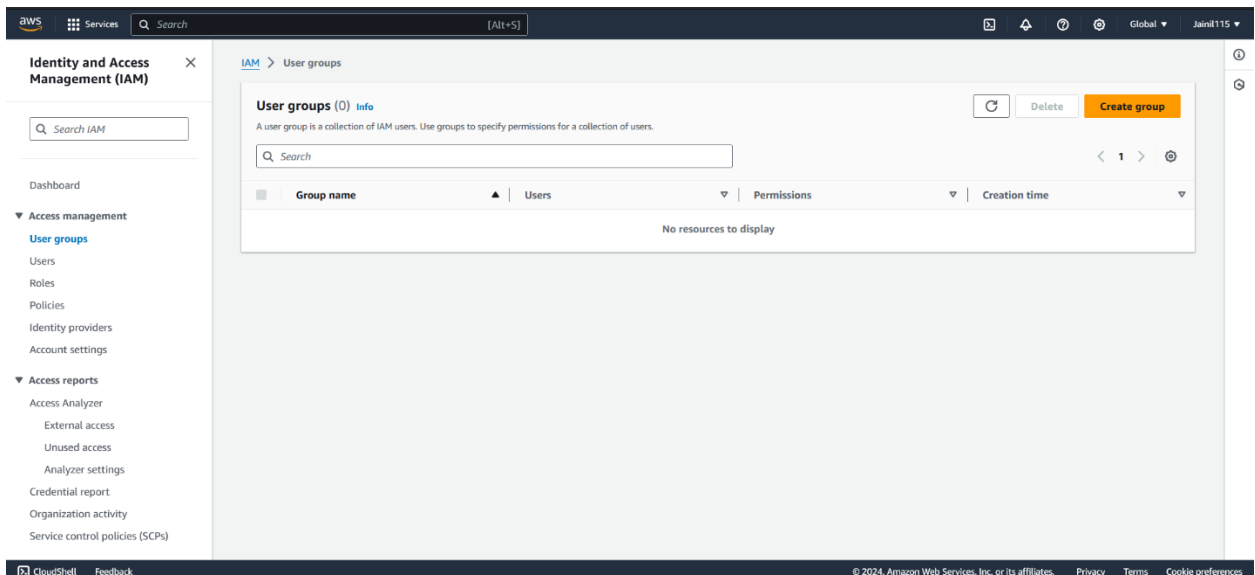

1. Create a new IAM group.
2. Attach the AmazonEC2FullAccess policy to the group.
3. Add User to Group

Steps to create IAM Group:

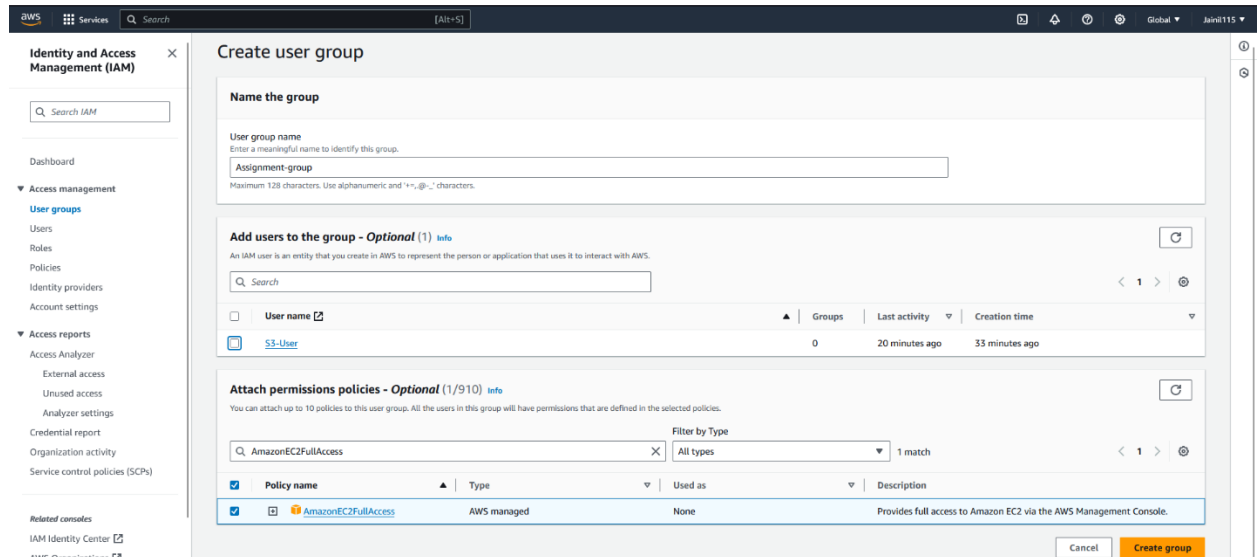

1. Search for groups in aws console and the select "Groups".

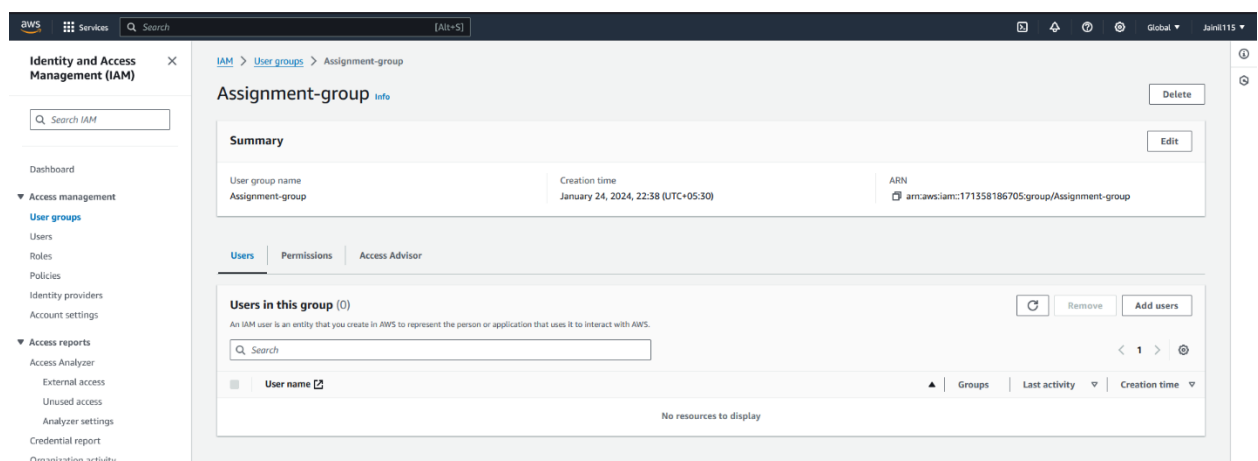

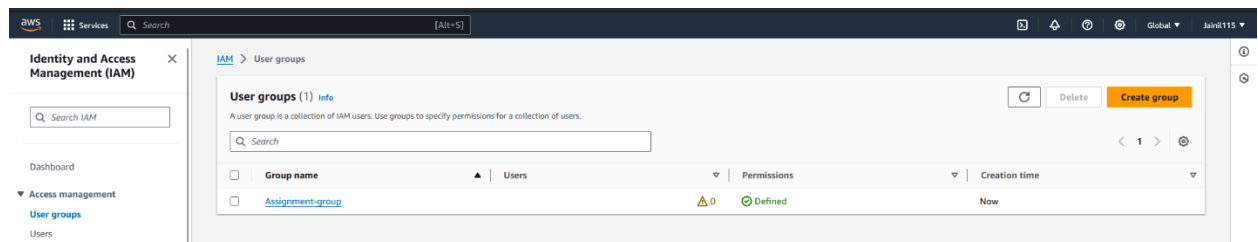

2. Then click on "create group".

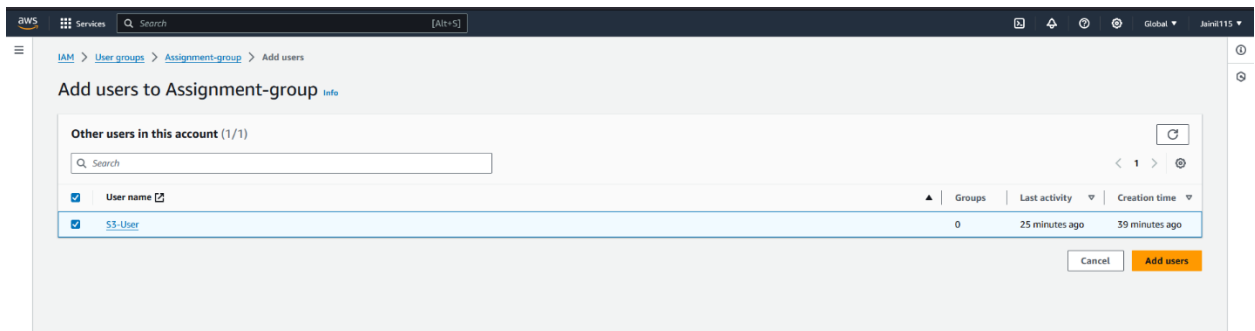

- Then enter the group name "Assignment-group", also select the "AmazonEC2FullAccess", Then click on create group. Users can be added in this step but it is optional.

- To add user to group you can navigate to IAM > User groups the click on "Assignment-group", Then click on "Add User".

- Add users by selecting them. Then click on "Add Users"

6. Now it will navigate return to the IAM > User groups > Assignment-group.
